

3-7X MORE

High quality alarm contracts produce more than 90 months of recurring revenue while maintaining their market value. Does it make sense to limit your profit potential by selling the contracts as soon as they are created? Our Legacy Program is the wealth building answer to the limited profits available through traditional dealer programs. Let RMR Capital help you build more wealth and capture more value.

Within a traditional funding program, a contract is sold for as much as ten times (10x) RMR above the creation cost. The Legacy Program allows the dealer to retain ownership of the contract and benefit from the revenue stream for the entire life. As a result, a contract with a 10-year life can earn sixty-five (65x) RMR above the creation cost or seven times (7x) more than a traditional program. Furthermore, additional wealth can be generated if the dealer decides to bundle and sell the contracts in the future.
